

Case Study – **Endeavor Energy Mobile Workshop**

- Fully transportable Road, Rail and Ocean freight.
- Pop up external drawing bench with sun shelter
- Custom racking and shelving to required specification
- Floor anchors to tie your load down safely
- Custom power supply with 10 and 15amp power points and lighting
- 1 x heavy duty access ramp hung on left door when not required

Excellent build quality, technical expertise and great customer service were key requirements when Endeavour Energy turned to the team at Containers First to build their mobile workshops.

Designed in conjunction with the field staff to be ideal for substation projects and made to suit future refurbishment when required. The mobile workshops were acquired for use by the substation crews. The client said: *“Our field guys have been very happy with the end product, the quality of build and internal fit out has been excellent.”*

When considering the build, it was found that only Containers First came up with a competitive price, superior quality of build and short delivery timeframe.
